

# MarFlex Training

**MarFlex**

Quality  
Our drive  
Our promise

MarFlex stands for quality. Quality that goes further than just the installation of our deepwell pump system on board your vessel. MarFlex deepwell pump systems continue to show their real quality during use.

▲ *Rotterdam training location*

It is essential that your crew knows how the MarFlex deepwell pump system works to ensure that the cargo is monitored and discharged successfully. Therefore, MarFlex offers to effectively train your crew. To ensure this, we make training as accessible as possible. This brochure explains our approach.

We provide training courses in our head office in the Netherlands, or at one of our training locations in Mumbai, Vladivostok or Rotterdam. Here we have created classrooms where your crew can practice with the MarFlex deepwell pump system.

We can also offer MarFlex Training for your crew on site; in your office or on board. We have developed demonstration equipment specifically for this purpose, including the NQZR demonstration panel. Allowing your crew to be trained effectively, also on site.

*NQZR demonstration panel* ►

◀ *MarFlex Training on board*

We develop the training course together with you. In addition to following the standard theoretical and/or practical training, we can tailor the training to the system on board your vessel.

It is important that your crew becomes familiar with the MarFlex deepwell pump system. Therefore, we offer attractive prices. Your area sales manager will be pleased to explain more.

▲ *Theoretical MarFlex Training*

◀ *Practical MarFlex Training*

The standard two-day MarFlex Training, including practice, is as follows:

## DAY 1

- **Introduction to the MarFlex deepwell pump system**
