

Cargo pump type MODP 150/200/300/350 built according to API-610

The MarFlex MODP series is a single stage centrifugal deepwell pump and uses the oil lubricated drive shaft principle. These pumps are designed according to API 610 and are intended for offshore service. Stack lengths up to 30 meters are possible.

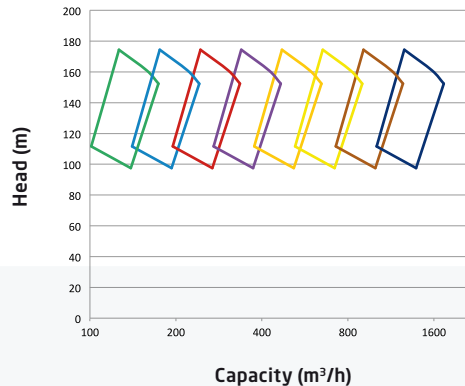

Pumps are made of

Material description	Material code
AISI 316L/Stainless Steel (standard)	1.4404
Duplex/22Cr Duplex (optional)	1.4462
Super Duplex/25Cr Duplex (optional)	1.4410

General

Cargo temperature	: -15/ +100°C
Maximum viscosity	: 4000 cSt
Maximum specific gravity	: 2,11
